Experience

Application Development Analyst @ Concrete - Part of Accenture

November 2019 - May 2020

Frontend Developer dealing with React-Native and React Web development. Keywords: Hooks, High-Order Component, Design-System oriented componentization, React-Navigation, JEST and Styled-Components.

Development Consultant III @ Grupo iv2

July 2019 - November 2019

Fullstack developer and co-architect on IT's Informov using VanillaJS, React Native and Fluig's Datasets. AngularJS development on internal applications (mainly hotfixes and implementation of new features on pre-existing apps). Key developer on B2B React-Native apps from scratch utilizing React-Redux, Hooks, AsyncStorage and Native components such as camera and gallery.

Development Consultant @ Grupo iv2

January 2019 - July 2019

Fullstack developer and architect on the company's Help-Desk system from scratch, used both as a commercial software and in-house project. Made with ES6+ (Airbnb standard) VanillaJS, BPM workflows, custom Widgets, ECM (for file management and logging of the application), OAuth 1.0a authentication, DB based entirely on Fluig Datasets.

Junior Development Consultant @ Grupo iv2

March 2018 - January 2019

Remote and in-person collaboration on TOTVS Fluig projects. Development of BPM workflows and high functionality Widget components for the platform. System integration with external databases (MongoDB, NodeJS, DBAccess Protheus and others). Key developer on the Make it Easy App using MEAN Stack.

Education

Faculdade Anhanguera, Jundiaí

Analysis and systems development.

Keywords: Architecture and Project Management, WEB Development (HTML, CSS, JS & PHP), OOP (JAVA WEB MVC with JSP / Simple JAVA Desktop interface (using NetBeans) with MySQL integration).
